

Matthew Smith
Individual write up

My contribution to the group was a simple one but not the least important. What I contributed was the flowchart. This chart allowed the group to plan out their scripts. The flowchart was split into 4 colors these colors were used to show relation. So all scripts were red for example, Anything related to functions was green, the shell main was yellow and the record files were blue. The flow chart also showed some of the basic functionality. This could be shown by its depiction of the while loop and the script. It shows how the loops loop back to the shell main. And how one of the scripts the exit script doesn't
